

HYDROSENSE SYSTEM

The Icare HydroSense is a range of active cooling products designed to manage and maintain a comfortable temperature. Heat sensitivity is a common issue caused by disease or immobility including multiple sclerosis, diabetes, kidney disease, reduced mobility, inflammation and climate.

The machine has night settings and a built in timer, to prevent chills. The settings can be changed using the touch screen control panel.

Code: PPMPM

LUMBAR STRAP

Code: PPLS

LEG & FOOT CUFF

Code: PPFLC

BACK & SHOULDER VEST

Code: PPBSV

HEAD & LIMB WRAP

Code: PPNHW

DURAL FUNCTION SPLITTER

Code: PPDFS

KEY FEATURES

- Water is pumped through the machine, and is adjusted to the temperature selected.
- The water leaves the pad and enters the reservoir, from there the water is brought back to the set temperature before circulating through the pad.
- The water flows through the medical grade silicone tubes quilted into the pad, and cools the body.
- Corner elastic bands help to hold the pad in place.

SPECIFICATIONS

- 80 Watts - uses less electricity than a light bulb
- Whisper quiet motor function
- Large temperature range - Cools to 8°C and heats to 48°C
